subregions, and county transportation commissions provided SCAG with proposed arterial projects.

Since the RTP is a financially constrained plan, all of the arterials could not be modeled as part of the RTP.

Projects marked with an asterisk (\*) indicate those projects that were modeled in the RTP analysis.

However, while the RTP must remain financially constrained, the implementing agencies will have the discretion to prioritize arterial improvement projects from the list based on performance criteria to the extent that allocated funding is available.

Note: SCAG sought input from stakeholder agencies for the development of the RTP. As part of this input SCAG was provided with proposed ITS projects. Since the RTP is a financially constrained plan, all of the ITS projects could not be funded as part of the RTP. However, while the RTP must remain financially constrained, the implementing agencies will have the discretion to prioritize ITS projects from the list based on performance criteria to the extent that allocated funding is available.
